

DOOR SLABS, COMPONENTS & HARDWARE

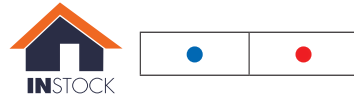

Table of contents

All products featured are stocked in our Tampa warehouse. Many items in this catalog have reduced pricing if purchased in full pack quantities (full pallet/box/roll); however, some smaller commodity items can only be purchased in those full pack quantities. There are also a select few items that can be purchased in less than full pack quantities if a \$5.00 broken pack handling charge is applied to the order's footer.

If an item must be purchased at full pack quantities, or will incur a broken pack handling charge, then that item's chart in the catalog will have a column at the far right called "MIN QTY".

If an item can be purchased at broken pack quantities, but there is a discount for full pack quantities, then that item's chart will have a column at the far right called "QTY BRK".

If an item's chart does not have a column with either of those labels, then that item can be purchased at broken pack quantities, and it has no full pack quantity discount.

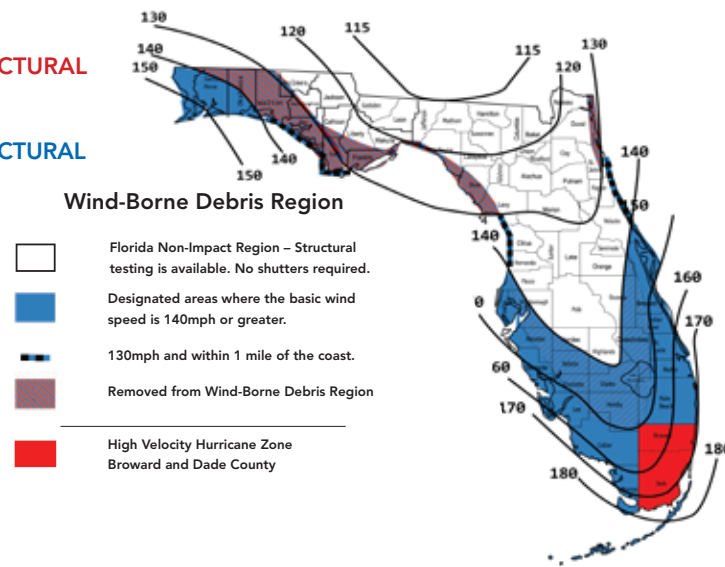

Consult your Slabs, Components, and Hardware Net Price Sheets for more details on what the discounts are, and exactly which items will get the \$5.00 charge if purchased in broken pack quantities.

On door slab pages, red bullets represent panels for use in the HVHZ (High Velocity Hurricane Zone) and blue bullets represent panels for use in the WBD (Wind Borne Debris) Zones.

Exterior Door Code Compliance

	= HVHZ IMPACT		= STRUCTURAL
	= Florida Wind-Borne Debris (WBD) IMPACT		= STRUCTURAL

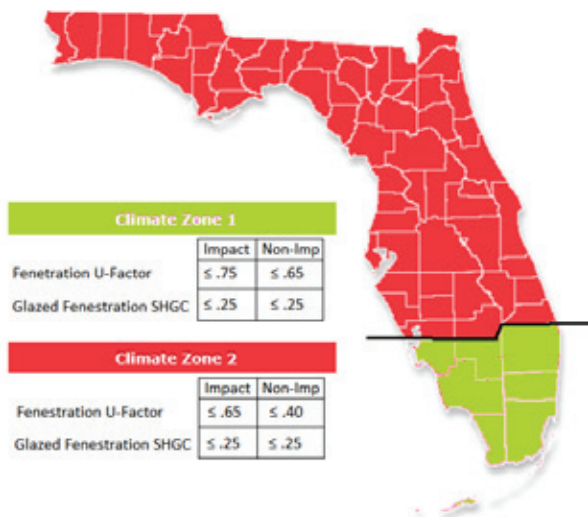

All door panels shown in this catalog (listed as HVHZ or WBD) will meet local and state product approval requirements when:

- Used with the correct components
- Assembled by a qualified door shop that has third party quality assurance certification
- Used in compliance with actual Plastpro Florida product approvals (See floridabuilding.org).

Exterior Door Energy Compliance

All door panels as shown meet the Florida State Minimum Energy Code. For these doors to qualify in a system, components that meet the energy standard must be used, and should be labeled by a certified shop with NFRC labels.

All products featured are stock items. Stock items subject to change.

IMPACT FIBERGLASS SLABS

IMPACT FIBERGLASS SLABS & SASHES

These doors combine sleek contemporary design with technologically advanced construction.

All door panels are sold unfinished.

Cut Out Specifications can be found on Pages 17-22

 FIRE RATED DOORS CAN BE SPECIAL ORDERED, MINIMUM PALLET QUANTITY REQUIRED.

PET DOOR INSERTS

PET DOOR INSERTS

Insulated Pet Door

NEW!

1/2 Blind Lite Over Guard Door Pet Door # 2

Don't keep your best friend waiting!

- For pets up to 90 lbs
- This system meets ASTM F588 300 lbs forced entry
- Meets structural, cycle, impact, and water testing for Florida's WBD regions. DP rating: Inswing +50 /-60 Outswing +45 /-45
- Low maintenance, energy efficient, extremely durable LEXAN flap and frame

The flexible LEXAN flap uses durable vinyl weatherstrip and rare earth magnets to create an energy efficient seal when not in use.

The flap is clear so you and your pet can see whats on the other side

Available in the following flap sizes:
 Large Pet: 10-1/4" wide X 15-1/4" high
 Medium Pet: 6-5/8" wide X 11-1/4" high

Each system comes with removable exterior and interior barrier panels. The interior barrier panel can be slid into place when you want to restrict your pet's access. The exterior barrier is secured with a key lock to keep small intruders and large storms out.

Insulated Pet Door

(continued)

Guard Dog # 2 Pet Door

Interior view

Exterior View

These Pet Doors come ready to easily install directly into a 23" wide by 26-3/4" tall door cut-out (1-3/4" door thickness). They simply screw in place just like a doorglass insert! Screw hole plugs are provided for a clean finished look. You can cut out a flush door, or this cut-out size fits nicely over the bottom panel of the DRS2B 6/8 2 Panel Door. Placing the cut-out at the bottom of your slab will leave you room for any 22x36 door-glass insert above it.

PVC VENTILATING

PVC Louvers come packaged with all required installation hardware. These louvers are designed to install like a doorglass insert- with the interior and exterior frames screwing into each other to hold the louver in place. Each louver also comes packaged with a Fiberglass Insect Screen.

PVC2264 Installed in DRS00

Fiberglass Insect Screen & Screw Hole Plugs

FOR 1-3/4" DOOR ONLY

ITEM#	SIZE
PVC1212FS134	12" x 12"
PVC2264FS134	22" X 64"
PVC2424FS134	24" x 24"
PVC2448FS134	24" x 48"
PVC2080FS134	20" x 80"

Custom sizes available by Special Order.

ALUMINUM VENTILATING

Aluminum Louvers come packaged with all required installation screws. These louvers are designed to install by having both their interior and exterior frames screw-mounted into the door skin. This method may require additional wood blocking to be installed inside the door skin around the cut-out on exterior door applications. This wood blocking does not come packaged with the louvers.

A1212D1M

FULL-LENGTH LOUVERS HAVE ONE VERTICAL AND THREE HORIZONTAL SUPPORTS.

ITEM#	DESCRIPTION
A1212D1M	12" x 12"
A1818D1M	18" x 18"
A2020D1M	20" x 20"
A2412D1M	24" x 12"
A2424D1M	24" x 24"

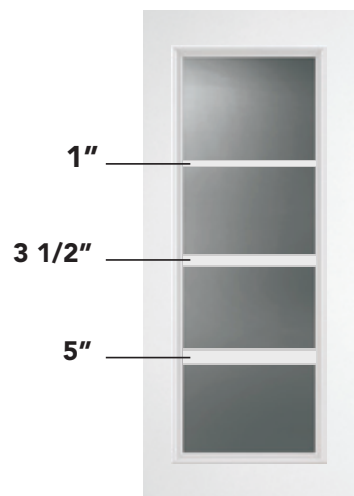

Heavy-duty louvers & custom sizes are available by Special Order.

ADHESIVE SDL BARS

CUSTOM GLASS PRODUCTS

Give any One Lite door a beautiful Simulated Divided Lite look by simply installing these adhesive backed PF SDL Bars on the glass surface. These can be used as a cost-effective way to get a sharp modern look that meets regional Impact Testing guidelines. They come in different profiles and grain types to match the most common insert frames in the industry.

FRAMES & MOLDINGS

plastpro® PF FRAMES™
Doorframes & Moldings

Plastpro's Polyfiber (PF) Door Frames are an innovative alternative to traditional door jambs. Their uniquely formulated door frame matches the beauty of wood, but requires less maintenance and will last for a lifetime. The material is highly durable, long-lasting, and is more thermally resistant than either wood or metal. This advanced system can be machined and installed the same way as traditional wood jambs- with no added hassles. When a fiberglass door is used together with a PF Frame system, they create an enhanced, weather and wear resistant entryway.

The closed cellular structure of our composite frames ensures that the molding will not absorb moisture, and that the frame will resist splitting, rotting and insect damage.

- Closed Cellular Structure
- Twice The Screw-Holding Power of Wood
- Rigid Polyfiber Formulation – Composite
- Easily Machined

BHISKPECAN	Pecan
BHISKCHERRY	Cherry
BHISKPKSTNCC	Satin Clear Coat

4-way Adjustable (horizontal and vertical) Strike latch plates

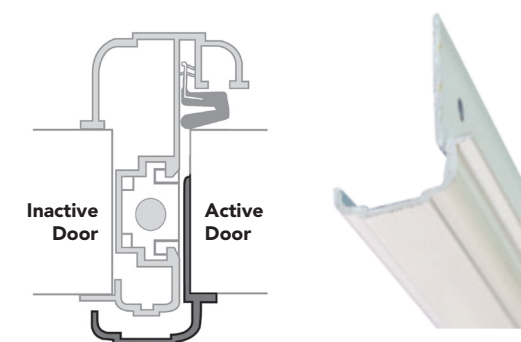

Flip lever locks

Slide bolt with machined center punch allows for precise bolt location and ease of installation.

Add on an Astragal Security Strip to any outswing double door combination for added security and a clean finished appearance- eliminating the reveal between the doors.

DLP Aluminum T-astragals are a stand-out amongst competitors in regards to Florida building code testing. Their rigid design will provide your double door entryway with increased security, as well as superior weather and pest protection. Designed for easy installation and operation, they have multiple advanced features:

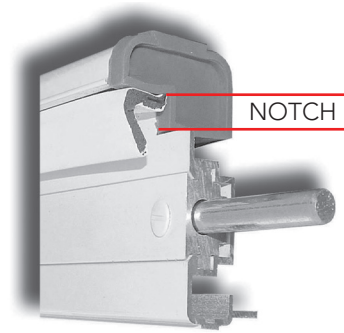

- Slide bolt with patented flip lever locking for security
- 4 way adjustable strikes
- Pin point punch
- Available in white or bronze finish
- Also available in a cost effective paintable/ stainable tan finish option

WEATHER SEALS

WEATHER SEALS

Weather seals

When it comes to keeping the good weather in and the bad weather out, our Weather Seals are the Real Deal. Both our short reach and long reach weatherstripping types are designed to stand the test of time in harsh environments. We also offer the best in door sweep options. All of our kerf door seals are designed to install into jamb kerfs perfectly – not too tight – not too loose.

DOOR HINGES

DOOR HINGES

Exterior & Interior Hinges

One of the most vital parts of any quality Pre-Hung Door System is the door hinge. No door unit is complete without them. A lot of weight can ride on these components for long periods of time (especially when hanging Impact product), so quality hinges are an absolute necessity.

Managing a supply chain for hinges is no easy feat. Getting well-built hinges at competitive prices often requires import purchases at very high volumes.

We offer the best-in-class hinges in durable stainless steel, as well as most other popular U.S. finishes. We also offer many finishes in both standard bearing and ball bearing versions. All our exterior hinges come with security features (Studs or Non-Removable Pins). We even offer Spring Hinges for increased ease of use.

MULTI-POINT SECURITY HARDWARE

The New Generation of Multi-point Locks.

PanoLock offers all the strength and security of a traditional multi-point locking system, with a few added advantages.

- Special adapters allow the use of most off-the-shelf trim sets. No dedicated hardware required.
- Two of the three locking points are tapered to enhance performance while reducing the amount of force needed for operation.
- Stocked in two sizes: 6/8 and 8/0.
- Stocked in two finishes: Bronze and Clear Anodized.
- Works with any stocked Yale or Pamex Handlesets.
- Works with all stocked Deadbolts except Electronic Deadbolts.
- Works with all stocked Leversets and Knobsets except Yale Heritage (YH) and Real Living Series.

Life is full of changes, and that includes your style. With PanoLock, you can change your door handlesets as often as you change your mind. Whether you prefer a sleek and modern leverset with a matte black finish or a traditional gripset in satin nickel finish, PanoLock is designed to fit your style and your choice of hardware.

MULTI-POINT SECURITY HARDWARE

TRILENNIUM™ Multi-Point Locking System

Security. Strength. Reliability. Performance.

Unmatched security doesn't have to mean compromised style. Trilennium offers a growing portfolio of attractive handset designs that work in conjunction with a locking mechanism which installs into a router carved pocket in the edge of your door. This mechanism features one solid unit with three latches based on patented I-Beam construction for reliable, proven strength and performance. Operating as one unit, all three latches engage when the door is closed. One movement of the thumb-turn or key turn activates all three deadbolts. Each latch is a deadbolt which adds increased protection for any entryway.

- Patented Strike Rollers and latches draw the door panel into perfect alignment with the jamb for a tight seal with no deflection
- A single downward turn of the interior handle releases all three deadbolts making it panic-proof
- Keying available; Our Stock has a SCHLAGE C Keyway, and can be keyed to Yale locks for whole house compatibility. Also available in Smart Key!
- Manufactured in the USA

ECLIPSE SHOWN IN SATIN NICKEL

See pg. 56 for Trilennium dedicated trim hardware. Our stocks leversets specifically designed to work with this system.

Residential & Light-Commercial Locksets

Yale Residential Securies offer a complete range of lockset styles and finishes perfectly suited to complete your door system. Combining years of engineering refinement with fine craftsmanship, Yale continues the high standards set forth by Linus Yale in the mid-19th century. These collections of locksets offer superior functionality, easy installation, and secure performance.

All Yale Locksets come packaged with installation hardware.

ASSURE TOUCHSCREEN DEADBOLTS

Our stocks Touchscreen Deadbolts with no Radio Communication Modules installed in them. Deadbolts with various module options can be Special Ordered though QuickShip (Z-Wave/ Zigbee, Yale Access).
